

## Patch Management Policy

### 1. Preamble

Mohokare Local Municipality is responsible for ensuring the confidentiality, integrity, and availability its data that is stored on its systems. Mohokare Local Municipality has an obligation to provide appropriate protection against malware threats, such as viruses, Trojans, and worms which could adversely affect the security of the system or its data entrusted on the system. Effective implementation of this policy will limit the exposure and effect of common malware threats to the systems within this scope.

This policy has been developed considering the following prescripts and or acts:

- Promotion of Access to Information Act (Act no 43 of 1996);
- Electronic Communications and Transactions Act (Act no 25 of 2002);
- The Constitution of the Republic of South Africa (Act 108 of 1996)
- The protection of Information Act (Act 84 of 1982)
- The Municipal Finance Management Act (act 1 of 2002)
- Organizational policies and Procedures (Mohokare Municipality)

### 2. Purpose

This document describes the requirements for maintaining up-to-date operating system security patches on all Mohokare Local Municipality owned and managed workstations and servers.

### 3. Scope

This policy applies to workstations or servers owned or managed by Mohokare Local Municipality. This includes systems that contain data owned or managed by Mohokare Local Municipality regardless of location. The following systems have been categorized according to management:

- Microsoft Windows servers managed by ICT Unit
- Workstations (desktops and laptops) managed by ICT Unit

### 4. Policy

Workstations and servers owned by Mohokare Local Municipality must have up-to-date operating system security patches installed to protect the asset from known vulnerabilities. This includes all laptops, desktops, and servers owned and managed by Mohokare Local Municipality.

### 5. Workstations

Desktops and laptops must have automatic updates enabled for operating system patches. This is the default configuration for all workstations built by Mohokare Local Municipality.

### 6. Servers

Servers must comply with the minimum baseline requirements. These minimum baseline requirements define the default operating system level, service pack, hotfix, and patch level required to ensure the security of the Mohokare Local Municipality systems and the data that resides on the system.

## 7. Roles and Responsibilities

- **The ICT Unit** will manage the patching needs for the Microsoft Windows servers and all workstations on the network.
- **The ICT Technician** is responsible for routinely assessing compliance with the patching policy and will provide guidance to all groups in issues of security and patch management.
- **The Accounting Officer or Change Management Board** is responsible for approving the monthly and emergency patch management deployment requests.

## 8. Monitoring and Reporting

The ICT Unit is required to compile and maintain reporting that summarize the outcome of each patching cycle. These reports shall be used to evaluate the current patching levels of all systems and to assess the current level of risk.

## 9. Enforcement

The ICT Unit is responsible for implementation this policy. The IT Technician may conduct random assessments to ensure compliance with policy without notice. Any system that is not updated according to the direction of this policy shall require immediate corrective action.

## 10. Definitions

<b>Term</b>	<b>Definition</b>
Patch	A piece of software designed to fix problems with or update a computer program or its supporting data
Trojan	A class of computer threats (malware) that appears to perform a desirable function but in fact performs undisclosed malicious functions
Virus	A computer program that can copy itself and infect a computer without the permission or knowledge of the owner.
Worm	A self-replicating computer program that uses a network to send copies of itself to other nodes. May cause harm by consuming bandwidth.

## 11. Review

This policy shall be reviewed annually
